Bothell, WA 98021

To Whom It May Concern,

I am writing this letter in support of Magnus Thomasson's application for the position available at your organization. Magnus was a hardware tester from June to October 2020 here at Keywords Studios. He was willing to fill in a night shift position and work overtime during a busy period on the project.

Magnus is a great tester that has been a positive contributor to our project's success. Beyond his ability to follow instructions, and stay on task, Magnus is very comfortable with communicating, either amongst fellow team members or with lead staff, which is something that I value highly in my testers.

Best Regards,
